

 Performing Arts, Dance

Germany

April - June / Sept.- Nov., 2013

I would like to have time to research on the tendencies of contemporary armenian dance and to explore the different streams. Moreover I would like to work historiographically to dig into the history of armenian dance. Through this I would like to create and curate a brief conference including lectures and performances. This is a way to give publicity to the art of dance which is all too often forgotten and unscrutinized. For this I would invite different experts and moreover produce an educational program about the importance of dance and -theory. I would like to finish my residency with a thesis which might result in a written **history of armenian dance**. This will also contain a dvd-documentary I'll produce. Also a result would be a dance-performance which shows my subjective understanding of **armenian movement**.

I would be very thankful for being part of the environment you offer with this Residency program.

**Thomas**
