and dissemination of Italian video art and new media. All selected videos are produced in the last years and have already been admitted in International Video Festivals. Invited artists are chosen as a representative group of emerging young figures already known and well-adjusted in the Italian contemporary art scene. The videos are of varying types, ranging from animation to performance, in order to give as complete view as possible of the today's video art in Italy. The initiative is part of the **Step Beyond** program, aimed to stimulate transnational collaborations and the mobility of artists and cultural actors. In particular it is focused on cultural exchanges between European countries and their neighbours. Following this the one-day-event in ACCEA/NPAK, screening of works of Armenian video artists will take place in Italy in January 2011, organized in **Visual Container** exhibition space in Milan.
