

 These workshops aim to create images without using a conventional camera and without using conventional equipment.

It will take place in  Mitq Analytic Centre, Deghatan 15/1 Yerevan

On Tuesday 27th September at 16:30-18:00

Workshop1: **PINHOLE** 

CAMERA

The artist  will build pinhole cameras, using shoe boxes.

A pinhole camera is composed of a shoebox with a tiny hole, through which light goes onto a piece of photographic paper.

The photographic paper is developed using photographic chemicals, obtaining black and white images.

Workshop 2:

CYANOTYPE

Also known as  blue prints 

Using special chemicals the Artist coats a piece of paper, which is then contact printed using an acetate negative and sunlight. Once exposed to sunlight, it is washed off in water and a blue image appears.
