I am an artist and educator working primarily in site-specific and multi-channel video installation. My work explores relationships between people and places as textural narratives, visual representations and as physical engagements, often using the conversation as a model or metaphor for shared human experience. I am interested in developing new video works that employ strategies of augmented realities, projecting video images into spaces where the imagery of the video interacts and intersects with the physical architecture of the space. I am interested to experience Armenian culture, to make connections with Armenian artists and to see what projects might develop
